

Eleni is an accomplished lighting designer with a comprehensive background in electrical engineering and acoustic design. She combines creative design skills with a strong technical approach. Her lifelong interests in music and dance led to theatre and TV lighting projects that, together with her engineering background, provided a solid platform for her work as an architectural lighting consultant. Eleni is a regular collaborator with Spatial Affairs Bureau and worked closely with Peter on the VMFA when he was with Rick Mather Architects.

Education

- 2002 Parsons School of Design, New York, NY
