

Peter Culley

Director, Spatial Affairs Bureau

Associations

RIBA ARB Assoc AIA

Peter is the creative leader and founder of Spatial Affairs Bureau- an architecture, landscape, furniture and product design studio in UK and US.

Spatial Affairs operates across disciplines and scales, recognizing and embracing the limits of each scenario, bringing experts in their fields to instigate rich collaborations and foster experimentation.

Peter comes from a background in cultural projects and believes in provoking essential discourse with institutional leaders, artists, curators, exhibition designers and audiences to distill resonant architectural narratives. To him, architecture is the intentional balance between interior space and exterior landscape mediated by the delicately resolved filter of an environmental envelope.
